have you heard any of the sound bars,,the very long speakers that sit under the tv,, that mimick surround?

Yes, I just demo the Yamaha YSP 4000 at Audio Advisors in fact, I like it very much since there will be no wire to hide, plus the focus is on center channel clarity. I would add a small 10" subwoofer as they demo the unit in the store.

Audio Advisors retail is \$1,699.00 Chuck will sell to us for \$1,420.00

Optimum 10" sub, retail \$1,300.00 our price \$1,100.00

Total system \$2,520.00

I will install it myself.

is this approved?

thanks,

Larry v
