Subject: Re: Sunfire Preamp

Yes there are more high fidelity amplifiers by manufactures such as " Parasound " and or " Bryston " very nice stuff but will be more money than the Sunfire. Don't know if that is necessary with out upgrading the speakers. The Sunfire are great Amps for the price.

Mr.Epstein I placed the Sunfire order and to my surprise they said they are no longer making the Sunfire Preamp (which does the Volume Control) they still are making the Amplifiers. I would recommend we go with an Integra preamp instead and will have more up to date HDMI technology included. We can still go with the Sunfire Amplifiers though. I sell a lot of these units. Please let me know if this is ok so I can continue to order all Equipment

I also had a pleasant conversation with Scott this morning and we are both going to work together on the Apple Stuff. He also gave me a recommendation that we go with a little Nicer Mac Mini in the theater than I specified for his future needs.
