Subject: GII update

Jeffrey

I just visited the GII maintenance progress,. No major problems, but many areas of corrosion in flight control, flap track, winglet attach point bolts and flight control bearings, normal stuff, on aircraft with 10,804 hours,... Gulfstream estimates a completion date March 2nd, Friday, I believe this is a good date, with a slight possibility of earlier, want to give you a real date for your planning purpose,.The schedule you provide me indicates you will depart palm beach on March 5th, I think we could plan on GII being able to fly that trip,.

thank you,
Larry
