Subject: GIV

Jeffrey,
You mentioned concern of cabin size on the GIV, just a thought, remove the fwd lav and make galley half the size, this would increase cabin length by at least 4 feet. . The fwd Lav has a cabin window on the right side and the left side fwd cabin window is blocked by the galley. This is normal for fwd galley GIV, and space is larger aft where dual divans are located.
This may not be cost effective to accomplish, but just a thought.

Thx,
Larry
