Subject: When you are absolutely bored

Hello Jeff,

Here is a link to my talk at the Simon's Center for Geometry and Physics, which I gave last month. This is an abbreviated version of my full talk. It puts forth some of my new ideas on this topic, which you may find interesting and which I outlined at your house a while ago. I am introduced by my old friend Michael Douglas, the prominent string theorist, and first tenured member of the faculty there. You spoke to him on the phone once when he was staying with me.

Sorry about the quality of the audio, but it is what it is...

Hope all is well on your end.

cheers,
me
