Hi Tyler and Jeffrey,

I am midst article on Seth Lloyd's work: (quantum operations in high dimensional vector spaces) and am waiting for him to get back to me to highlight what he wants to emphasize. I just left another voice message and email for him today. He will need to review the article as well-- just as Martin Nowak did.

In the meantime, I have another article ready: AI in Ethiopia. I'm waiting for Ben Goertzel to add his input.

I'll follow up with both of them closely and am working to get these ready asap. We can publish whatever is ready first.

Am also adding the NET link to Wiki and social media as discussed.

Tyler, could you update me on all the other platforms or projects you are working on?

Thank you,

[REDACTED]
