Jeffrey,
here is my explanation of what transpired on 6th floor speaker system, Nick explained the following while
Scott was helping trouble shoot the speaker buzz,.

Nick found the (midrange) Synthesis speakers blown on 6th floor, Nick informed me the Synthesis speakers
have two mid's which are only active when utilizing the Synthesis processor, the other mid's sit dormant
when using speakers with normal Dolby 5.1 or 7.2 receiver system, like we are operating now. Nick
exchanged the blown Mid's with dormant Midrange speakers so system would operate normal, Nick was
suppose to order new Midrange speakers for the Synthesis,,just to have speakers in normal condition,.

thank you,
Larry
