Have you reviewed that yet? As currently laid out, it is about 3' from center of column to face of wall. I think this needs to be closer to 5'-6'.

> Jeffery, we had planned on sending you some updated images of the main residence, and the flagpole pool paving, earlier this week. As you know, I am out all week. Tom was supposed to be back from New York earlier this week, but had to extend his stay there. He worked on some images while he was there, but they do not yet address all of the items we discussed last week. We will both jump on this Monday, and get you some images to review on Tuesday. I am sorry this is taking so long.
