Hi Jeffrey,

Below is a summary of what I've done. My press release output will increase. All of your public profile sites are done-- which allows me to upload press to them from anywhere with one click.

- I've published 7 press releases,
- Wrote the foundation's summary and your bio.
- Installed 19 public profiles with foundation's summary, bio and labelled and tagged 62 photos for each one.
- Labelled 62 photos for ongoing use.
- Set up your blog with ongoing content, archived photos, links and press : www.thejeffreypsteinfoundation.com
- Set up your main website: www.jeffreypsteinfoudation.com with ongoing press, content, links and archived photos.
- Reset your other two websites: www.jeffreypstein.org and www.jeffreypsteinscience.com and creating 6 more pages for the .org site.
- Continuous update of all of your public profiles with tagged photos and press.
- Rewrote your Wikipedia site (as much as they would allow anyway). And got them to push down your mug shot and other negative content.

The new stuff is sticking now to google's 2nd page and is periodically on the 1st.
