Subject: Car seat

Jeffrey,

Escalade seat update:

- I spoke to Michael Angelo at NYC Custom car today, he is going to price a fwd passenger seat to install in rear VIP seat, he indicated its best to install the new seat track approximately one or two inches inboard to permit seat to be installed as far aft as possible for most leg room,. the curvature of the floor board just aft of your current seat would interfere with seat track installation. He is familiar with this type of install.

Michael thought its best if he's able to purchase the seat frame and electric seat motor as one unit, compared to pricing each piece individually. Should have pricing later this week, parts and labor,.

-Sushi:

, I will bring the White Tuna with me tomorrow, I land in NYC at 9:30pm and will deliver to 71st once I arrive in New York,.

thank you,
Larry
