More expensive than microwave
You will still need power to run your phone system and data
Will get cost for second run of fiber from D mark to RC
Also cost for separate services delivery

Ok

My understanding is in doing fiber run from D mark to main house means we either do 1 of three options to provide service to ranch central

1 a completely separate service (fiber run) from the d mark to ranch central

2 run fiber MH back to ranch central

3 microwave link from MH to Ranch central

The third option is basically what we are doing now

The proposed solution fiber to RC then microwave to MH provides service to all locations without back halls of fiber or microwave

For your consideration
