Subject: Re:

three points he mentioned yesterday that i thought you find amusing, old teachers show no improvement over young teachers,, therefore a feedback loop is missing, emotion is a configuration state of the system, survival and emergent property of many systems seeking homeostasis at the same time, , liberals favor larger group interests, universe , etc. right seek smaller (family , club etc). smiles and frowns are social currencies,

Sounds like a good idea. I have one of those accounts that allows multiple video calls -- I just have to initiate it. (for future reference, I'm just '[REDACTED]' on Skype)...
Thanks for thinking of me.. the guy really is right along my alley.

How interesting. You don't impress easily, so this assessment means a lot to me (I've not encountered anybody out here who really impresses me, btw... which is weird, given the density of tech guys etc.).
This next trip is getting compressed, given that Robin will be with me and two of our kids are in NYC now. I would hate to have you make all these arrangements and then we could only spend an hour or two. (Plus, who knows what his schedule is like -- I show up in 2.5 weeks.) Can we set up another trip?
Something to look forward to!!

Thanks, Jeffrey.. This really has brightened up my day.

Thanks for your speedy reply, Joscha...
Your interests and mine do in fact have a huge overlap. I would
enjoy meeting you.
I was in Berlin last year (at Humbolt), but have no plans to return
soon. I do plan on being in New York with some frequency, so
perhaps we might have a chance to get together there.

Let's stay in touch.

With best wishes,

s.

Thank you very much for that offer, Stephen! – I live
in Berlin, though, so meeting up in person will require
a bit of organizational effort. It is quite likely that I
will be in the area again soon.

I am very interested in integrating cognition, ie building cognitive
architectures, understanding the nature and
organization of mental representation on a functional

(not necessarily neurobiological) level, and somewhere down the road I would like to learn more about the emergence of visual/perceptual grammars, mental simulation, and the genesis of language. I think I have some basic understanding how to build a computational model of motivation (helpful for attaching relevance to mental content, and providing reinforcement signals for open-ended learning, social interaction and exploration), and how to conceive of affect as a configuration of cognitive modulators. (I wrote a cognitive architecture, MicroPsi, and a book on the topic, called "Principles of Synthetic Intelligence", from OUP.)

Cheers,

Joscha

Thanks, Jeffrey!

Joscha: If you live in the SF Bay area, let's find a time for a cup of tea or a drink. If you don't live around here, where do you live?

steve,, joscha , is doing some really interesting work , in motivation, artif intelligence . I think you both would enjoy some time with each other. joscha seems to be able to formularize many

things that we have
discussed in the past. see
you on the 22
