Dear [REDACTED],

It's terrible, I am crazy !!!

On the little scratches,

It's strange !

Because, I see a the scratch.

I feel that a person has concealed the desired impact.

There is also a scratch on the shelf !!!!

Because I see the paint on the varnish ?

The damage on the corner of the cabinet and delicate.

On my last mail, have you made a finding of the accident?

I want to know who opened the box?

Which transported the desk out of the box?

Because, I myself watched the desk the packing list, it was perfect.

There were more special protection inside the box.

It is impossible that the desk took a scratch in a secure box.

Is the only place at the time of unpacking.

Who unpacked writing desk?

I was myself present at the time of packaging !!!!

I myself closed boxes package before shipping !!!!

My carrier is in discussion with the forwarder to know as explanations.

best regards

frederic
