[silkinstitute-notes2014.pptx](#)

He is trying to figure out best structure for developing IP, doing research (he's very generative/creative/hard core scientist), license, spawn companies. I'm thinking he hasn't quite got the structure right. Huge potential. Needs viable structure, funding, focus.

The material (the silk ceramic especially) feels amazing to touch/hold. Like amber in some ways. Extremely bio-compatible & versatile.

iPhone feature: Tupos & Abbrvtns
