Subject: Bougainvilleas - July 2, 2014

Greetings Sir,

ABC Nursery (Cliff) was able to locate the 45 gallon bougainvilleas at a farm in Orlando. The nursery quoted him \$450-500 per plant.

In addition, he estimates the trucking from Orlando to the Miami port to be about \$1,000 and the container for the 10-12 plants at \$6,200.

He has not calculated his costs as yet, but the price, thus far, per plant, would be between \$1,050.00 and \$1,100.00.

Bryan's Plants can not locate the 45 gallon bushes. The largest they have found is 15 gallons.

Neither of these 2 nurseries have ever had to source bougainvilleas as large as the 45 gallon.

Respectfully submitted, Daphne
