Subject: update

Jeffrey, Boeing completion is based on Engines returning from Miami,.
Engine shop should be ready to deliver the engines first week of May, my guess May 15th or about that date for Boeing test flight,.

sorry, missed your call, I was on the phone with Miami Engine shop,.
first engine is in test cell for pre disassemble runs,. bore scope indicates some delamination of Compressor area side walls, light corrosion,, which we expected in tail pipe area, to early to tell price impact, but these are normal for engine corrosion inspection,.

-Gulfstream PBI is schedule for baggage door seal when we arrive Thursday, part is in hand already and will start as soon as we Land. I will have them inspect Fwd door seal for inflation issues, etc during this visit,.

thx
Larry
