Subject: Re: data highlighter tool

Yes - I am on flight still but could discuss tomorrow as well. This is part of updates we are implementing with the additional content on the sites

Also for your authored content we will be referencing it [REDACTED] via this method (we spoke about this some on Thursday)

Ps - I am working with EJAF to further promote latest article and secure additional placements for reinforcing our sites

Any responses from the donor list ? Same benefit here

Hi Tyler,

Google webmaster has a new tool that highlights structured data on a website: ie: event listings. The highlighted data shows up on the side of search results but also under the website.

by elongating search info under the site, it pushes down other listings below it.

can we discuss on Monday? and [REDACTED]

[REDACTED] a newsfeed on the science site and [REDACTED] updated links to the websites.

thanks,

[REDACTED]
