Subject: time to regroup

regardless of marks response I think **a brief meeting** so I could hear from you directly what you need done now and for 2014 would be a good idea (include mark too if you want)
if not I do advise me coming by 71st to **update all the base stations firmware which apple just released** (unfortunately they released this the day after my last visit or of course I would have done it then)

thank you again for all you have done

Scott
