Yup and tons more going too
Works for other stuff
Found some really amazing ppl

They all think about role of bacteria invading.

Vagus will end up being key since it is only link bw enteric and central nervous systems

No one looking at viral stuff and vagus which is where I think the big news will be. I wish I could do it. Herpes reactivation from Vagal ganglia causing paroxysmal afib. Parkinson's as anretroviral skin disease affecting nerves. Lou gherig (ALS) is botulism like bug entering through enterics but goes to spine rather than brain. Etc.
