He asked who I work for , your name . I said it is a private information and I am not allowed to spread this information . I was confused to answer and did not want to lie to get into a worse trouble because if he wants he can check . He was not satisfied w the answer and I am afraid he will ask again when I come back from school . Also he asked how much I make per month by working for you and how am I going to study at school and work at the same time
