Hey Zac - we have had that specific video on Vimeo as a password protected video. This video has content that cannot be seen by the public. This video cannot be used on a public splash page at this time.
I was planning to re-upload to Vimeo today as a PW protected video. Will send you guys that link later today....

Best,
Chris

Hi Jennifer, I've just tried to grab the Sizzle Reel but the vimeo URL doesn't exist now.

This is the link Joan sent me originally <https://vimeo.com/72782139> - confirm for me this is the correct link and if it's changed send me the new one, I'm ready to get the video up as a splash page to serve as an intermediate while I build the new promo site.

Also, if you're able to send me the actual video as an mp4 file I'd really appreciate it in order to embed the video into the new site as a pure video file rather than a Vimeo-branded video. It would look more professional if we had the video playing from within the site without any external branding like YouTube or Vimeo.
