in checking the theatre when i turned on the apple tv and tried to preview a movie the sound came out all digital distortion (the video played fine and fast)

thinking it might be the apple tv I opened the side panel and pulled the hdmi cable and plugged it in directly into my mac

the audio was still distorted

I have explained the situation to Rich B and he requested I email you directly on this issue and request your instructions

on how you would like us to handle the fixing of the issue

please advise

thank you

scott
