Subject: Gym Lights/flowers

Dear JE,

Roy and I stopped by the gym to check on the remote for the lights. The batteries were changed but the light switch is a dimmer and it was turned all the way down. Plus the remote has to be aimed just so to connect with the sensor on the light switch panel.

We may want to consider repositioning the piece of equipment which is in front of the light switch to provide a wider range. Please let me know.

Yes, the yellow flowers do look wilted. I will ask Chris if they are getting too much water. Some of the leaves are brown. I looked at a few and did not find mites. Regarding the smell, Roy and I did not notice a smell. Was it noxious? Mold-like? Does it occur at a particular time of day?

Ron
