Subject: To Mr Last RE: James Last Music as Medicine

Dear Mr Last,

Thank you for your email - I am honored by the interest of "Hansi" and his family.

Yes, it would be great to meet while you are in the US. You might find a visit to the Institute for Music & Brain Science website of interest re: overlapping missions: <http://www.BrainMusic.org>

Where are you in the US presently?

Yours,
Mark

Subject: I would love to talk to you about Music as Medicine
To: [REDACTED]

Dear Mark Tramo,

my father, James Last, has been in a major recording star for many years.
Over the years we have received many letters both from doctors and their patients about how they felt that his music helped them during operations and in the post operative recovery phases.
I am currently developing a device to put this to further use that has gotten some very favourable comments from medical professors in Germany.
I would really like to talk with you about what aspects your research has so far covered and to see if there might be areas where we might have mutual interests.
If you are interested, you can find me at this email address or, as I am still in the US until July 31, I can be reached at [REDACTED]

I am very much looking forward to your response,

Best regards,

Ron Last
