Mr. Epstein attached is pictures of the Corian back splash from the 1st floor kitchen .I removed the panel to see if we could reverse it to make a repair but as you can see it to far gone.To replace it properly we need to replace the back splash on that back wall from the small piece on the left of the stove ,behind the stove and the back splash wall of the kitchen sink area . I think it will be very hard to get a perfect match being the corian is very old. So to make it look good i recommend we change the entire back splash area from the stove to the sink which is 176"Long X26"wide so when you come in the kitchen the wall you see will be the same color . I have the contractor searching for a match or something very close .When the contractor finds a color match he will send a proposal for the replacement. Richard
