Jeffrey

At present the poolpak is only able to circulate some of the air from the pool room
If the spa was to be heated to operational temp then the exterior pool doors would need to
opened to allow outside air into the room.

Would you consider installing screen doors so outside air could come in, without all the other
creepy crawlies, birds& bats invading the space.

The cost per door enclosure is estimated at \$1300.00 installed, would recommend min 3 doors to
allow ample air into space.

This would also help when a power loss occurs

http://www.dycwindows.com/pdf/dyc_stormdoors.pdf

The screen doors are the 740 series but with screens not glass and would be close to existing
door color.

Can we proceed and if so 3 or 5 doors

regards

Brice Gordon
