Morning. Out of left field one of our network in the US (out of Chicago) offered us 10million shares of Facebook (secondary market as not yet IPO'd). Price sought is c.$135million. It represents approximately 0.5% of the fully diluted shares in the company. This is not a direct link to the vending shareholder but through a broker. If you want the details I can forward them to you. It is a real deal but in this case we are distant from the vendors. Just in case you like the idea of any of the guys you meet in New Orleans may be interested! Kevin
