Subject: need your advice

Jeffrey, I am thinking a lot about what you say in terms of my major and future career opportunities. I still haven't declared my major and can switch to different one but have to decide soon. Considering my interests in diplomacy and water infrastructure what do you think I should rather do. I know I am not a mathematician and it will be hard for me but worth it and I guess it will give me a greater access to any position I want.

please take a look at this one <http://www.newschool.edu/lang/courses-subpage.aspx?id=2368> and let me know what you think.

it says I can't take it as a minor because I am BA in Liberal Arts so will have to change or take a different major that will allow me take this curriculum as a minor
