We created a facebook page for you with very specific privacy settings, and showing information and links that only we want to show.

To view it, and see it how the public will see it, and we have a certain hacking program, which will boost it to the front page of google, knocking out some of the other bad stuff. Just have your assistant search under Jeffrey Epstein when she is logged into her FB account. It will take a while for the search engines to find it. If she can't find it this way, have her do it under a false email account search that we set up:

jeffreyepstein7@gmail.com

No one can post anything on this site. And, it contains only the information, photo, and other stuff that we wish people to see.

Also, while she is there, and I think she is friends with me on facebook, go look at my own profile page, and check out the photos from our Celebration of Mind event. you might find them fun.
