Jeffrey,
In the library system I used an adapter that plugged into the Tuner input on back of pre amp, Take that RCA adapter to 1/8" pin adapter and plug it into the MAC lap top headphone jack, then plug into an "open audio IN" on back of pre amp. That should work...
Or:
At the mac store or a Radio Shack, you need to convert the 1/8" stereo head phone jack in the back of the lap top to stereo RCA jacks (red & white), then plug RCA jacks into back of pre amp, audio IN, and plug the 1/8" pin into headphone jack of lap-top.

Thx,
[REDACTED]
