American Cancer Society.docx

Hi Jeffrey,

Attached is the first of a batch of articles that are currently being optimized by Business Wire. They will send them out over the next few days. The article attached is on the benefits of microfluidic cancer cell detection. (studies conducted at Mass General and funded in part by The American Cancer Society)  
Please glance at it-- it is a very interesting topic.

I've noticed that by starting the article title with your name and using varied text, the sticking power is better.

Results:

Your .org site and your science site stay on the first page.

My articles have staying power on the 2nd page, right after your .org site.

Your blog stays on the 2nd page.

Your forum stays on the 3rd page.

Your foundation site stays on the 3rd page.

Your .org site has had more than 50,000 visitors.

I'm hoping that this next push of articles, leaves a few of them on the 1st and 2nd page.
