Subject: LJS pool

Jeffrey,

I have consulted two audio experts, Guitar World (Same store as Canal Street in NYC and Chuck at Audio Advisors in West Palm Beach,. the following are three options I have formulated, if you could guidance, I will finalize a price quote,.I am taking into account the location and salt air that will effect the speaker life, so each of these packages offers a special advantage, option 1 durability, option 2 durability and average sound for lower price, Option #3, BIG and LOUD, just not perfect weather speakers,. see below for some details, let me know which way to focus?

thank you,
Larry

Option #1

purchase new Techo Nomad like we had in past by old pool: this would be the most durable system, however sound quality would be average in my opinion.

“...The only completely weatherproof (loud)speakers...

- Sound & Video Contractor

Weatherproof Loudspeakers – AS Series

Stadium, mobile, restaurant/retail.

Weatherproof Loudspeakers & subwoofers
Unmatched audio quality, IP56 / Mil-Spec 810F

Option #2

This was Audio Advisors idea: should be best quality music and most durable, may not be volume you require.

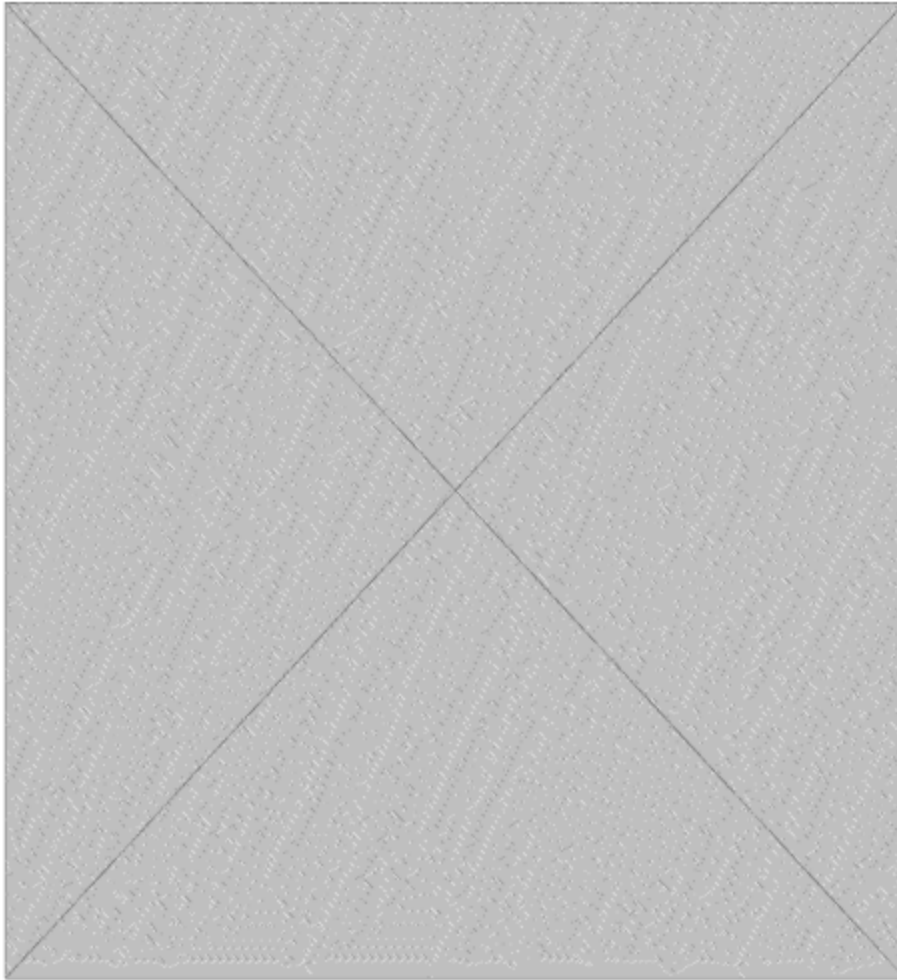

-Install two Atlas 280 lbs Stadium subwoofers with 15" driver,.list \$1,947.95
discounted on line \$1,559.50 ea Total \$3,119.00

-install Six Klipch out door two way speakers (only 15" tall) 9 lbs ea list \$1,650
(discounted to \$1,352.88)

-utilize the three Crown amps I have in storage from Nick's project in Palm Bch.

I would build a Three foot high "L" shaped wall to corner load the sub woofers and direct sound toward listening area,.

Atlas Sound AHSUB15S 15" AH Series Stadium Subwoofer Systems

The AHSUB15S subwoofer system features high output and amazing low frequency response for indoor and outdoor application including football stadiums, sports arenas, baseball fields, and large auditoriums.

Unit features an efficient low frequency woofer loaded into a durable, weather resistant, rear firing enclosure.

Features:

- 250 Watts power handling
- Easy installation. Secure surface mounting or suspension installation is possible via the integral forged eyebolts.
- Easy, weather resistant connection via a convenient recessed terminal block located on the back of the loudspeaker
- Impressive efficiency rating of 103dB 1Watt/1Meter makes the AHSUB15S a perfect choice for low frequency augmentation of high energy music playback at sporting events.

- Maximum output of 127dB (Rated Power @ 1M)
- Weather & rodent resistant. Rear firing woofer cavity and mesh screen over the enclosure front protects the speaker from weather and/or rodent damage.

Specification:

- **Height:** 30 9/16" (77.6224 cm)
- **Width:** 30" (76.2 cm)
- **Depth:** 29 1/8" (73.914 cm)
- **Shipping Weight:** 181.00 lbs (82.10 kgs)
- **Frequency Response:** 55Hz to 120Hz (±5dB)
- **Driver Type:** 15" Low Freq Cone
- **Dispersion:** Omni
- **Power Rating:** 250 Watts
- **Sensitivity:** 103dB SPL (1W/1M)

Option #3

This would be the loudest big sound, actually a 5,200 watt system. we would need to fabricate protective housing for the speakers for weather,.these speakers are used for outdoor concert and have hard plastic shell with plywood interior structure, very durable housing,.

-JBL Powered speaker system, each speaker has a Built in Class D 1000w crown amp,.

- install JBL PRX612M Four two way speakers, each with 1000 watt crown amp built in- List price \$1,299.99 on sale \$799.99 each Total \$3,200.00

-install four JBL PRX618S powered 18" subwoofers w/600 watt List price \$1,499.99 on sale \$999.99 total \$4,000.00 for subs

total speaker only \$7,200.00

The JBL PRX612M 12 2-Way Active Stage Monitor is the most compact and versatile speaker in the PRX600 Series. It has been designed to deliver maximum performance for its weight and size as both a stage monitor and a front-of-house monitor. PA. Two user selectable EQ settings are provided to optimize the system for either application. With a dual socket pole mount, the PRX612M is a perfect match with a PRX618S subwoofer, offering a high performance self-powered sub/sat system. The PRX615M is comprised of a 305 mm 262F-1 Differential Drive woofer, a 2408H-1, 37.5 mm annular polymer diaphragm, neodymium compression driver mounted to a 90 degrees by 50 degrees horn, all driven by 1000 watt Crown Class-D digital power amplifier. A proprietary DSP chip is at the core of a fully featured input section, providing user selectable system EQ, protection, input sensitivity selection, cross-over functionality, dynamic limiting and discrete component optimization. The amplifier input panel offers XLR or 1/4 in jack compatibility and a sensitivity switch providing extra flexibility, making it possible to connect literally any sound source without using a mixer. Signal present and limit lights indicate the system status and assist in setting the optimum level, via the level control knob. All PRX600 cabinets are built from a combination of 25 mm and 18 mm, strong, lightweight poplar plywood made structurally sound with tongue and groove joints. All PRX600 Series cabinets are protected by JBL's...
