Subject: GII update sim traning

Jeffrey,.

Mars Avionics Manager, Frank will return in the morning to help trouble shoot GII autopilot issue and determine, Stab Aug comptr, or Pitch computer,.all communicate together.

I received a letter from Flight Safety yesterday to advise me they officially decommissioned their GII simulator and no longer offer a GII simulator...re-current training will be done in GIII DC simulator with differences training for GII, Simuflite also offers GIII sim only, no more GII. Their reason was simulator repair expense. I know we are on the right track to moving on, just wanted to share the timing of this letter.

thank you,
Larry
