Issue 1, 2013

Attend the Free Wolfram Virtual Conference Spring 2013 »

Learn how Wolfram Technologies power innovation across all industries and academic areas, including your own teaching and research. See how the Computable Document Format, Wolfram *SystemModeler*, and *Mathematica*'s parallelization capabilities can give you an edge. Join us on April 16.

The First Computer-Based Math™ Education Country »

computerbasedmath.org recently announced that Estonia will be the first country to make use of its revolutionary and widely praised rethink of math education in a project to build a new and innovative statistics curriculum. Estonia is the first; is your country next? Read Conrad Wolfram's blog post for more details about this project and leave us your comments.

Celebrating 100 Years of Markov Chains »

Just in time for their 100th birthday, *Mathematica* 9 introduced fully automated support for discrete- and continuous-time Markov chains. The seamless integration with *Mathematica*'s powerful hybrid symbolic-numeric computation engine makes modeling real-world Markov and queueing examples easier and more flexible than ever before. Explore some applications with us.

Math for All Ages with Wolfram|Alpha »

Did you know that Wolfram|Alpha can be used by school teachers, tutors, education majors, and students for elementary math classes? Wolfram|Alpha now offers a variety of new tools to explore addition, multiplication, and basic math word problems using number lines, manipulative illustrations, and step-by-step solutions.

Get Insight into *Mathematica*'s Visualization Capabilities »

Want to learn how to create instant interactive visualizations, perform 3D geometric modeling, and bring your 3D objects to life? Experts shared their tips at the Wolfram Visualization Virtual Workshop 2013, now available to stream.
