Subject: Hanger Door option

Jeffrey and Gary,

possible hanger door option:

These are fabric roll up Hanger Doors, they are rated up to 120mph wind, not sure the building code for STT, I will speak with Ken Hobson at Port Authority and check what the requirements are,. I have seen these before, interesting since they let light inside hanger during daytime,.

see the web link:

<http://www.paraportdoor.com/>

thx,
Larry V
