Not to late, time frame for temperature to be 37 degrees which are forecast high, is 4pm till 9pm, after 9pm temps begin to fall toward freezing,,
At this time a 630pm to 730pm arrival is best, for ceiling, after 9pm lower ceilings, better forecast in the morning

Jeffrey,
Teterboro weather:
8am - Noon, snow in the morning, 1 - 3 inches of accumulation, turning to freezing drizzle, 300 overcast and 1/2 mile visibility,, by 1pm, warm front moving into New York area turning snow into freezing rain, and by 5pm only low ceilings and rain,,
Our estimated arrival of 6:30pm is decent at this time, forecast calling for 500 broken, 1500 overcast and 3 mile visibility after 5pm, for Teterboro,,
I will have better forecast at 10am tomorrow as warm front moves into NY area,. I will keep you posted.
thanks
Larry
