I've become very friendly with this woman. She and her husband are both biology professors at Stanford. What is the name of your friend at Stanford? I couldn't remember his name yesterday.

Hi Eva & Glenn,

Thank you both so much for lunch and the ranch tour yesterday. The food was wonderful, and it was great to see the ranch. As I told Glenn, I do think there are some opportunities for research there for Ward and/or me, so will be in touch again about that closer to next summer. Regardless, we'd be very happy to have [REDACTED] (if he should be interested) help out/ shadow us for a time next summer if they want.

Ward sends his regrets again that he wasn't feeling up to making the trip yesterday, but he's considerably better today, so I think it was a wise decision. Another of my students has come down with the virus that's going around, so we're both trying to stay healthy!

And again, if any of you find yourselves in Palo Alto this coming year, please let us know. It would be fun to get together again. I will also keep my fingers crossed re: [REDACTED] chances at Stanford, assuming it's still on her list of schools (which my students tell me it is).

Hope your trip back to New York via LA goes smoothly, and soon again -
Carol
