They contacted me to run for the head of solid waste and green development (I declined).

They offered it to me BC they want to give the urban job to the internal candidate.

During my second Interview with the woman who would be my boss she was abusive and weird. Would not have been a good situation.

So, going to do the secondement which is a lot more flexible and hopefully the right thing. We will start shaping it this week and hope it works out. Lots of work.
