ok
so instead of going to the video app on the ipad to play a video

go to the music app

there find the category podcast ... if the video i downloaded is still there play it and video should return to normal

If you don't have that video under podcasts

go to the itunes store pick any short video podcast and download it ... again try to play that video with the video app

if this does not work restart the ipad and try once more

hope it works!

otherwise let me know If you need to stop by
