Subject: Schedule for next week

Rich,

I wanted to inform you that Gilbert is scheduled to be at the site next week on Wednesday August 17th and Thursday August 18th. I apologize for the delay of this project due to the unfortunate data uploading of the chiller panel. I do not foreseen any issues at this time since we're able to determine what caused the issue which was the upgrade from Insight 3.5 to insight 3.11. Since there are three panels left to be done including the MEC panel. I will attempt to request an additional specialist at the site that day. I've received the change order today with regards to the additional panel and expedited the order for the last controller that will be monitoring the bedroom space. It should arrive no later than Friday August 12th.

Thank you

Francis Edouard
