Subject: Re: S76 flight time

Jeffrey,

Weather should clear in the Boston area around noon Sunday, New Haven CT has good weather, only adverse weather is wind and **turbulence**, estimated at 16 kts gusting 28kts most of the day in New Haven and NYC area,. I will monitor wind direction tomorrow, my concern is landing at the West Side NYC heli pad with a 21kt tail wind,. at this time I'd prefer landing Teterboro,, if tail wind is present at west side pad,. other wise clear skies for tomorrow afternoon and evening,.

thx

Larry
