Subject: GYM update / outstanding issues / RETURNING tuesday

JE,

The Apple TV is set up in the GYM and is called **gym** on the network.

Had major sound issues that I resolved by plugging the aTV into the Digital input of the Receiver. The toslink digital cable we had was no good so I had to **use the one from the 2nd floor iMac** to set up the system. (I JUST BOUGHT A REPLACEMENT cable FOR YOU and I will **replace the one I used from the 2nd floor tuesday**)

The other issue is while we have wired internet base stations in the Blue and Pink bedrooms on 4, but **there is no wired ethernet connection in the gym.**

Every configuration I tried only gives us an ok at best connection in the GYM. I spoke with Richard B. about this and **the only way to try to fix that for you is have one of the telephone jacks in the gym converted to an ethernet jack.** This was already done to help resolve internet connections in the oval office and 2nd floor office.

RB is managing that part of the job and we should have a solution in place next week.

So playing music in the gym from the iPad worked and sounded great, video mirroring does not.

I did not charge you for any of the extra time I was there today and will return to 71st tuesday to replace the cable on 2.

And help you and [REDACTED] try to fix the contact issues you guys are having after the lion and iOS 5 updates.

thank you

Scott Denett
