Larry

I talked to Mark Macalister and he's to call me back on the big doors, roll up or folding.

here's my pass at a scope of work that I would like you to comment on and expand where needed

Big door solution

repair/replace two roll up doors(come off track if open past 3/4 up)

strip and paint floor

paint walls and ceiling

new halogen ceiling light fixtures, do you have a fixture in mind and how much light you would like?

elect will need to be redone as 1/2 the building doesn't work

new generator, is manual switching ok, and is the current size adequate ?(subject to additional load for door power)

Things I need more data on

bath room program

office program(it definitely needs cross bracing to keep it from falling over!!!)
