## P R E F A C E

IN 1842 J. O. Halliwell edited for the Camden Society a volume entitled *The Diary of Dr. John Dee*. To the diary itself, which extends with considerable gaps over the years (1554) 1577 to 1601, he appended the catalogue of Dee's manuscript library, taken from an autograph MS. in the Gale Collection at Trinity College, Cambridge (O. 4. 20). This catalogue it is my purpose to reprint here, and to furnish what information I can about the books entered in it.

Bibliographers will readily agree that this is worth doing. They will remember that Dee was not merely an alchemist and spiritualist, but a really learned man, and one who had done his best, by petitions and otherwise, to stimulate interest in the rescuing of MSS. from the dissolved monastic libraries and to induce the sovereign to establish a central national collection of them. They will also be aware that we have but very few sixteenth-century English catalogues of manuscript collections, and that the investigation of the destinies of a dispersed library may be made to throw much light upon the formation of the collections which still exist.

It will be as well, before we embark upon the examination of the catalogue, to have before us the leading dates in the life of the owner of the books. John Dee was born in 1527. When the Diary begins, we find him living at Mortlake. In 1583 (on September 21) he left England, with the impostor Edward Kelly, for Bohemia and Poland, whence, after a most unsuccessful and detrimental sojourn, he returned to Mortlake in December 1589. In 1595 he was made Warden of Manchester College (now the cathedral) : in 1604 he came back to Mortlake ; and in 1608 he died there in poverty.

Our catalogue was made on September 6, 1583, just a fortnight before he started for the Continent. As soon as he was fairly off, a raid was made upon his house by the less respectable residents in Mortlake (among the better sort he seems to have been popular and well-liked), his books were, to some extent, dispersed, and valuable scientific instruments broken or stolen. On his return six years later he was able to recover, it is said, three-fourths of the books, but the apparatus was gone for ever. The cause of the raid was no doubt Dee's dealings with spirits, which not unnaturally earned for him the reputation of being a sorcerer.<sup>1</sup>

The catalogue of 1583, then, cannot be regarded as a full record of the manuscripts which Dee possessed at the time of his death. Some volumes will be entered in it which were lost or destroyed soon after it was made, and, on the other hand, during the twenty-five years that elapsed between its making and Dee's death, it is not to be supposed that he did not make additions to his collection. There are, in fact, volumes in exis-

<sup>1</sup> The marginal notes written by Dee in the MS. of this catalogue at Trinity College relate in some cases to this spoliation. One such, which occurs only once in the list of MSS., but very often indeed in that of the printed books, is 'J. Davis spoyle'. There are variants of this: e.g. on f. 3 of the MS. apropos of a work of Cusanus, 'Jo. Davis toke (w<sup>th</sup> others) by violence out of my howse after my going', followed by the sentence, through which Dee has drawn a line, 'He hath got the Mathematicall part of Cusan.' Again, 'Jo. Davis sent me one volume home, the other lacketh.' 'Jo. Davis spoyle he hath not yet restored, as may appere by his letters.' Other like notes are 'Mr. Jak restored', 'Widdow Gardiner (or Gardiner's Widdow) restored'. Davis, Gardiner, and Jak are all mentioned in the *Diary*. In Oct. 1579 Davis figures as one of the persons who are continually being 'reconciled' to Dee: in Feb. 1583 he is one of a group who confer with Walsingham about the North-West Passage, and in March he goes off to Devonshire. Robert Gardiner in May 1582 has revelations vouchsafed to him about the philosopher's stone, and seems to have been in Dee's employment. In May 1590 Thomas Jack restores to Dee part of his 'magnes stone', and in July sends him back a hammer.

tence which contain his name, with dates of acquisition long subsequent to 1583.

He may have parted with some of his treasures under stress of poverty during the years immediately preceding his death: his biographers say that he did: but the fact is not of great importance as regards our investigation. It is of more interest to learn what happened to the library when he was gone. Upon this some light is thrown by Archbishop Ussher's correspondence. Sir Henry Bourghier, writing to Ussher in 1624 (sixteen years after Dee's death), speaks of 'Dee's library, which hath been long litigious, and by that means unsold' (*Works*, x 227). In another letter (March 23, 1624-5) he says 'Vettius Valens in Greek is Mr. Selden's now, but was sometimes Dr. Dee's, but the rest of his books will be had very shortly, as many as are worth the having'. In October 1626 Dr. Bainbridge, Professor of Astronomy at Oxford, writes to the Archbishop: 'I am bold to enter your grace's *bibliotheca* with the humble request that I may have the names of such mathematical books as were Dee's.' He adds that he had seen in London a list of bare titles of Dee's books, and had been to Sir Robert Cotton, but *his* books were not yet ordered in a catalogue. From these passages I gather that litigation (consequent most likely on Dee's debts) had prevented the dispersion of the library until 1625 (probably February 162<sup>5</sup>), and that, when it was finally sold, Ussher and Cotton had made considerable purchases. Selden, we see, also bought at least one book. We find Dee books, too, in the collections of Digby, Ashmole, Savile (Sir Henry, who died before Dee): but there is a yet more important purchaser. The number of volumes from this source which have made their way to Corpus Christi College, Oxford, cannot fail to arrest attention: it constitutes by far the largest portion of Dee's library that is to be found in any one place.

Now a document exists (C.C.C., Oxford, MS. 280, p. 235)

which shows that a number of Dee's MSS. were offered for sale to the College by Brian Twyne, the famous Oxford antiquary, who was a Fellow of the society. The purchase was declined, but the books were ultimately bequeathed by Twyne to the College.<sup>1</sup>

Twyne's special reason for buying the books I can only conjecture; but my conjecture takes this form. John Twyne, his grandfather, schoolmaster, mayor, and antiquarian, of Canterbury, had procured a good many MSS. from the dissolved library of St. Augustine's Abbey there, and these had afterwards come into Dee's hands: Brian Twyne knew this, and desired to recover and keep together his grandfather's collections. Certain it is that many of the Dee-Twyne-Corpus Christi books are from St. Augustine's,<sup>2</sup> less certain that they were owned by John Twyne. Brian Twyne, by the way, did not succeed in securing all the St. Augustine's MSS. that Dee owned: the most important one, the catalogue of the Abbey library, went to Ussher, and is now at Dublin. This is all that I can learn

<sup>1</sup> The documents are as follows:

(a) An acknowledgment of £15 due to John White, bookseller in Little Britain, for MSS. bought by B. Twyne for the use of the President and Scholars of C. C. College in Oxon. to be paid before 14 March. Dated 22 Feb. 1625: signed Th. Amyan, President.

(b) A similar acknowledgment by the same of £3 6s. due to J. White. Dated 23 Feb. 1625.

(c) Notes by Twyne, viz.: 'I made a generall catalogue of these booke at London, & when they were brought downe to ye Coll: ye company would not consent that any money shuld be layd out for them. Br. Twyne.

They were returned vpon ye President.

They were parcell of Dr. Dees booke & some of them very rare: & all worthy of ye buyinge for ye Coll: Library, if they had byn more.'

<sup>2</sup> Several entries, to which I can as yet find no corresponding extant MS., answer to entries in the St. Augustine's Catalogue, viz. Nos. 20, (59), 68, 107, 120, (138), 159, 171, (173). Of the extant MSS. sixteen can be traced to St. Augustine's.

Similarly one or two books may have come from the Austin Friars at York (see the catalogue in *Fasciculus J. W. Clark dicatus*), viz. Nos. 72, 75.

or guess as to the destinies of Dee's MSS. immediately after their dispersion. We find stray volumes making their way into the libraries of Pepys, Gale, Harley, and Sloane (one at Lambeth must have been bought by Bancroft before Dee's death). I have found but one for certain in a foreign library, and that belonged to Kenelm Digby. Two others, doubtful, are among Queen Christina's MSS. in the Vatican.

There is more, however, to be said about the growth of the collection. We have two lists of Dee's MSS. earlier than 1583. One (List A) is in a small notebook of his at Corpus Christi College, Oxford (MS. 191). This book contains:

1. List of MSS. owned by Dee in 1556.
2. List of MSS. borrowed by him from Peterhouse, Cambridge, to be returned in 1558.<sup>1</sup>
3. Contents of a MS. borrowed from Dr. Hathar.
4. Contents of a MS. borrowed from Queen's College, Oxford.
5. List of MSS. bought by him from John Leland's library in 1556, and from other sources.
6. Alchemical books read by him in 1556. This last item does not concern our present investigation.

The other (List B) is contained in the British Museum MS. Add. 35213 (formerly Phillipps 10701), to which Mr. J. P. Gilson and Mr. J. A. Herbert kindly directed my attention. It is the volume from which Mr. Gilson printed the very interesting catalogue of the MSS. of Long Harry Savile of

<sup>1</sup> Of the books (six in number) borrowed in 1556, five are still to be found in the catalogue of 1583. But we must not be hasty in accusing Dee of dishonesty. One of the borrowed MSS. (now Ashmole 424) has a note in Dee's hand to the effect that it was presented to him by Peterhouse in 1564 in exchange for a gift of printed books. Dee parted with it before his death: in 1606 a 'Dominus Hypsley' gave or sold it to P(atrick) Saunders. These same names occur in another of the books, Ashmole 1471, also with the date 1606.

Banke (d. 1617).<sup>1</sup> On ff. 1–4 it contains a roughly-written list of Dee's books, written and printed, in his autograph, the MSS. being entered on ff. 3<sup>b</sup> and 4. This list cannot be far removed from A in date, but it is not clear to me whether it is a little the earlier or a little the later of the two. List A is, in any case, of greater importance, since it shows the sources whence some of Dee's MSS. came.

My chief object in this investigation is to identify the extant remains of Dee's manuscript library. With this in view I have examined a great many collections at London, Oxford, Cambridge, and elsewhere, as occasion offered: and not without success. Halliwell gave identifications (not always correct) of 22 MSS.: mine, certain and doubtful, number over 120. The means of identification vary. Sometimes we have Dee's signature in full; but often we have to depend on subsidiary marks: autograph notes are not uncommon; other books bear a  $\Delta$  or the astrological sign of Jupiter thrice repeated  $\frac{4}{4} \frac{4}{4}$ , or a mark like a small ladder. Sometimes names of owners, like P. Saunders, whom we know to have been Dee's associates, combine with the contents of a MS. to ensure an identification. Often the contents of the MS. are the only guide. The list itself will afford the reader the means of judging of the weight of the evidence in each case.

I have collated Halliwell's text of O. 4. 20 with the MS. without finding any important differences. One feature, it is true, Halliwell has omitted to notice, and I cannot wholly explain. With few exceptions the entries of MSS. up to no. 67 have a T prefixed to them. The others have in most cases the letters Fr. These same letters, T and Fr., are prefixed to the entries of printed books, which of course fill the greatest part of the MS. For Fr. I can suggest an interpretation. At the very beginning of the volume is this note in Dee's hand, minutely written and somewhat injured:

<sup>1</sup> *Trans. Bibliogr. Soc.* vol. ix. 1907.

Andreas Fremonshemius | Birkmannorum Coloniensium in  
Anglicos (?) | Distractor Librorum | siue Bibliopola . . . | exscri-  
psit Mortlaciij | ipsos omnes . . . | singulos libros | considerans.

The Fr. then may indicate Fremonshemius, the agent of the Birkmanns, who perhaps contemplated buying the library, but cannot ultimately have done so. Who T was I cannot now guess—not Twyne, at any rate. Happily the letters seem to have no value as indicating the present whereabouts of the books.

There is a second MS. of the catalogue of 1583, viz. Harley 1879: it is in the same hand as the Gale MS., but does not contain the letters T and Fr., nor any marginal notes by Dee. It has, however, prefixed to the catalogue on f. 19<sup>b</sup> of the whole volume (which contains several catalogues) a note in Dee's hand (I think) which is not without interest, though it does not bear directly on our subject:

'In the Book of St. Aug<sup>ten</sup> of Canterbury . being a large Foll.  
Book in an old red cover containing 385 leaves.

The beginning of the book is in a latter hand then most of the book and is an Exemplification and Confirmation of all the charters of the Kings proinde (?) to Ed. the sonn of Edward mad in the time Radulphi Abbatis.

In the first leaf of the old hand, after the former Exemplification, and vnder the charter of King Aethelbert and priueledg of St. Aug<sup>ten</sup> anglorum apostoli, there is wrytten thes words following in a rud secretary hand

Liber Johannis Twyne de grayes Ine ex dono patris sui  
Johannis Twyne Teste Humfrido Jurdano Rectore  
ecclesie de Sturmowthe. per me John Twyne

The sam is wrytten in pag. of the sam book 212 over a deed  
of 3 roods and a half of land in Newland

This book is now in the hands of on Mr. Wilford of Kent  
an[d] old gentellman being in fette(r) layn a recusant.'

The book here described is doubtless the Cotton MS.  
Claud. D. x.

We find more of it in Clark (*Wood's Life and Times*, iv. 91, *Oxf. Hist. Soc.*). Brian Twyne (xvi. 407) cites: Thomas de Thanet (vixit 1272) *Matricula scil. de variis chartis libertatibus ac privilegiis et possessionibus monasterii S. Aug. Cant. Init. In nomine domini J. C. notum sit omnibus tam praesentibus quam posteris quod ego Adhelbertus.* It was given by John Twyne of Canterbury (but query of Gray's Inn : see above) to Thomas Smyth high-customer of London, and was afterwards in the hands of Richard James of C.C.C. Oxford : a thick 4to with a red cover.

The notes have some interest as recording the fact that John Twyne owned yet another St. Augustine's book.

Of the general character of the collection a few words must be said. It is in the main a special one, got together to assist Dee in his peculiar studies. Had it survived intact it would have been a first-class repository of mediaeval science books excluding medicine. Alchemy, astrology, astronomy, physics, geometry, optics, mathematics are all very copiously represented ; and Dee appears to have given special attention to collecting the works of two great writers, Roger Bacon and Raymund Lull. There is very little theology, and no ancient poetry. Among the classical MSS., one containing the versions of Plato's *Phaedo* and *Meno*, which was made in Sicily for Frederick IV—see Val. Rose's articles on it in *Hermes*, vol. i—is of special interest. History, British and English, is perhaps the subject best represented next to Natural Science. One Welsh MS. occurs.

Few of the MSS. which can be identified are very old. Perhaps the oldest is the Lauderdale Orosius, now at Helmingham, which is not in the catalogue. The Priscianus Lydus (A. 15), Isidore (94), Boethius (114), Aethicus (9,80) are of respectable antiquity.

I have not attempted to collect here notices of MSS. of Dee's own writing.

Ashmole 1720) of such of Dee's MSS. as had come to his hands. They are all records of his intercourse with spirits, and have no bearing on our present subject.]*

Of other MSS. which certainly or probably belonged to Dee, and do not occur in the Catalogue, I have noted the following in various collections : but I have little doubt that the list is incomplete.

#### Helmingham Hall, Suffolk. Lord Tollemache's Library.

The Lauderdale MS. of Alfred's Orosius is recorded to have belonged to Dee, but his name is not to be found in it.

#### Lambeth Library.

598, pt. III. Creton's poem on the deposition of Richard II has the note 'John Dee 1575 gave for this boke a boke of the foundation of (blank) in Oxfordshire'.

#### London, British Museum.

Sloane 2325, paper, cent. xv, ff. 33. Ioannes Dee 1557 beginning: Many a regyon & contre y haue y sowte.

Stowe 1070, paper, cent. xv-xvi, ff. 74.

Ioannes Dee.

Patricius Saunders 1606 (?)

G. Theophanes (= Tiffin) 1730.

R. Farmer.

It contains some fourteen alchemical tracts, of which the first are—

1. Tract. Nicholai Comitis.

2. Summa Platonis.

3. Speculum Alkimie Rog. Baconis.

And the last is: Dialogus inter Naturam et filium philosophie.

#### Oxford, Bodleian Library.

Ashmole 1451, pt. II, a paper MS. of 66 ff. in English and Latin, of alchemical tracts mostly by Brixham with marginalia by Dee.

36 *Manuscripts formerly owned by Dr. John Dee*

- 1492, pt. I, a paper MS. of 6 ff. Io. Dee 1569. Opus expertum Parisiis  
 . . . 1540.  
 Digby 192 (Raymund Lull) Ars demonstrativa; has a note of Dee's of  
 1576.  
 218, art. 3. Bacon's Opus Minus according to Twyne belonged to Dee.  
 Oxford, Corpus Christi College.  
 65. Tacuinus, from Twyne, has some notes of accounts, perhaps in  
 Dee's hand.  
 101. Ptolemy, etc., has a note on f. 1 by Dee (?) and at the end a letter  
 of Casimir of Poland to Cracow University.  
 127, 128. From Twyne; bound together: Bacon de erroribus medicorum and some alchemical tracts: may be Dee's, but have not  
 his hand in them.  
 134. Life of St. Oswin; from Twyne: marked 4; but belonged to  
 Savile of Banke.  
 136. Collectanea Alchemica, Latin and English; belonged to Dee in  
 1559.  
 144. Astronomica, Alanus de Insula, G. Vinsauf: from Twyne.  
 Came from Tynemouth Priory (as also 134).  
 148. Bacon's Greek Grammar: from Twyne.  
 152 has the ladder-mark and belonged to Dee: see Wood's Life and  
 Times, iv. 266-7. It contains works of Nic. Kratzer.  
 153. Io. Dastin, etc.: from Twyne.  
 185 has the ladder-mark and apparently Dee's hand on the verso of  
 a fragment of a will at the end. Contents alchemical.  
 191 is Dee's note-book: see above.  
 223 has the ladder-mark. Bacon, Urso, etc.  
 226. Marbod, etc., partly by the scribe of 227 (see above, no. 169):  
 has a note 'Receyved at Manchester by Col. Arnold from  
 Mistres Marie Nevel 1597 Dec. 17'.  
 237. Life of S. Katherine, etc., in English verse: has the ladder-mark.

#### ADDITIONAL NOTE

Dee's own account of the pillage of his library, and of its value, is to be found in the 'briefe note and abstract' of his career (drawn up in 1592) which is printed by Hearne in *Joh. Glastoniensis* (II. 500). Here, on p. 529, we read :—

'The divers bookeſ of my late library, printed & anciently written, bound & unbound, were in all near 4000: the fourth part of which were the written bookeſ.' He values them at £2,000. 'And, to make this valuation probable unto your Honour, behold yet here these four written bookeſ, one in Greek, this great volumn; two in French; and this in High Dutch. They cost me and my friends for me 533<sup>lb.</sup> . . . What is then to be thought of the value of some one hundred of the best of all the other written bookeſ, of which ſome were the *autographa* of excellent & ſeldome heard-of Authors? The furniture of the ſaid library was of my getting together in above 40 yeareſ time from divers places beyond the ſeas, & ſome by my great ſearch and labour gotten here in England'. He then gives ſome account of his mathematical instruments, and of two collections of Irish and Welsh deeds (the latter, apparently, rescued from a half-ruined church). On p. 534 he values his lost books (above 500)—'I mean ſuch as may be gotten for money'—at above £150.

I cannot tell what the four MSS. were which he produced as a ſample; but the price paid for them is enormous; and the catalogue of the MSS. shows that in 1583 he did not possess much over 200 MSS., whereas here he reckons them at 1,000. I doubt if we can trust his figures; but the extract deserves to be quoted, and the 'abstract' to be read.
