Frer diligent Search for this Book, having by happy accident met with it, and procured it for my uk: fince I am minded to communicate it to the Curious and Worthy, I shall give you some account of the Authors, and then The Authors are Kiranus and His pocration. Kiranus was King of Persta, to which Crown none but Magicians could be admitted, and of which Kingdom the lation Zoroastres the first Magician, was. This work of his had been for many Ages turned out of the Person into the Spriack, Arabick, and most Eastern Tongues. Harpocration, as the Learned are of opinion, was a Gracian, There were several of this Name. bin; where he mentions several Harpocrations, and among the rest ours, as the Sequel will prove. He is at a mighty loss about one Harpocration, whom Tertullian mentions in his Book De Corona Militis. Tertullian's Words are these; Liberum, cundem apud Agyptios Ostrin, Harpocration industrià hederatum argumentatur, quod kederæ natura sit cerebrum ab! heluco defensare. In English thus 3 Harpocration does argue, that Bacchus, the same with Oliris among the Ægyptians, is pictured with lvy on purpose, because it is the nature of Lvy to defend the Brain from Drunkenness. Now Maussacus, after he had confuted the Mistakes of several Commentators upon these words of Tertullian, who would make him to mean Harpocration that wrote the Lexicon, comes to one Commentator, whom he thinks in the These are the Words of Maussacus. right. "Jacobus Pamelius, the last Commentator up-"on Tertullian, has taken another, and a quite! Which thing, how far

Now that Treasure which Maussaus so much wisht for, I here offer to you: for it is the Book of Kirani and Harpocration, as Gesner's Bibliotheca cites its and it goes Alphabetically as Putean says his Harpocration did in the Cardinal's Library. And as for the controverted Place in Tertullian, consult but the Letter @, pag. 26. of the first Book, and you may be satisfied, that Tertullian quoted no other Harpocration but ours. Read on to pag. 28. and you have this Pallage. " That you may be without Drun-"kenness, and for all favour and health; ln " the Stone Thyrsites engrave the Bird Thy, " and Bacchus holding the Bird, and under " the stone enclose the Root of the Herb, " (meaning I_{Ty}) and wear it, and you will

And that learned Father Tertullian layes, Harpecration argues, that Bacchus, the same with Osiis among the Ægyptians, is pi-Jured with Ivy on purpose, because it is the Nature of lay to defend the Brain from Drunkenness. So that Harpocration's and Tertullian's Sense are altogether the same. And this must bethe Book which no lefs a Man than Tertullian quoted as an Author, and which many Learned Men fince him have longed to see, but could not. And Barthius, another Learned Critick of his time, giving an account of some Greek Physicians, who were never yet published, strangely extolls Kirani. For whereas others only transcribed one from another, and little is to be had from any one of them, that may not be found in Hippocrates and Galen; Kirani has many prodigious Virtues of things both in Medicine, and other Affairs, contained in the Subjects which he mentions. Barthius moreover fayes, he faw this curious Manuscript in the possession of Henry Ellenherger, primary Physician to the Court at Magdeburg, who may very well he reckoned among the greatest Phylicians

Barthius would by all means have "Favour with all men; and moreover you had it published, being a Book of such infinite "will be without danger in the Palace For value: And the rather because it has some-"this is a divine Dionystack, and weakens the thing of Harpocration in it, who is so highly and defervedly valued by Learned Men. And he reckons it to be Tertullian's Harpocration, as Pawelius before himimagined, and as by comparing the Pallages in these two Authors we have already proved. So that it is not only my Opinion, but it is the Conjecture of Pamelius, who could not after his most inquisitive Search and Research, meet with Harpocration; and it is the clear Judgment of that vastly Learned Man Barthius, who saw Harpocration. And I the rather mention Barthius, because this Translation is from a Copy of that very Manuscript which he saw in Dr. Ellenberger's hand. Being thus far fatisfied of the Original Authors, our next buliness will be to enquire concerning the Tran-Barthius conjectures that the flators of them. Translation out of the Agarene, or Arabick Language into the Greek, was the Work of a Monk of Constantinople, in the time of Manucl or Emanuel Commenus, the Son of Calojoannes; the Conclusion of whose Life and Empire was foretold them both in two Greek Oracles. Besides, Historians write, how his Acquaintance and Friend. This Physicians write, how his Acquaintance and Friend. at that time the Greek Nation was mightily an printed it privately; for neither his own, addicted to Magick. And so, in all likelihood, this Greek Interpreter must be well skilled therein. The next Translation out of Greek into Latine, was made about three or four hundred years since, by one Gerardus, a most excellent Physitian of that time. Trithemius sirnames him Fulginas; Raphael Volaterranus, Suchonas; but Gesner and the most call him Cremonensis.

This Latin Translation has been quoted by many at the second hand. But I never met with any that saw so much as a Manuscript of it, till Bartlins (as we told you) saw it in Dr. Ellenberger's Hand, who kept it as a precions Jewel, and a great Rarity. He had wrote in the Book with his own Hand, That he received this Book in Manuscript, as a singular Boon, from the most Illustrious Lady, the Lady ELEONOR, Landgravess of Hesse. descended from the Family of the Dukes of Wirtemberg. at Darmstad, Anno M.DC.IX. This Book

It bears Date M.DC.XXXVIII. So that it seems, but a few Copies were printed, and those privately distributed; one of which with some difficulty I procured.

As for the Book, it seems to be one of that fort of Books which Men in the Ads, who used curious Arts, brought together, and burnt, the Price whereof being counted, was found to be fifty thousand pieces of Silver. But since such miraculous Zeal is ceased, with the rest of Miracles, this piece of Curiolity needs no more undergo Martyrdom, than Christians now need sell all, and live upona common Stock, as they did in the Fourth of

the Ads, especially since Tertullian, one of the Fathers, quoted it. It contains, I confess, much Curiofity in it; but nothing to endammage Christianity, where it is so firmly settled: And if there be formething that deferves the Sponge, yet all ought not therefore to be obliterated; nor must the Child be thrown away with the Bathe. But the time the Authors lived in, requires some Grains of Allowance. And those hidden specifick Vertues of things, and strange Methods in curing Difeafes, may atone for the Scraps of Vanity and Superstition that are in the Book. I find, that former impolite Ages, were nevertheless very curious in Affairs of Philosophy, and in that regard surpailed our better cultivated, and more literate Age. I find also, that great Deference was given to our Authors: Infomuch that Albertus Magnus (who is quite spoiled by unskilful Transcribers) quotes this very Book. For in Trinum Magicum, p. 168. there is this Passage, Magicalis cognitio existit in speculatione rationum, & in speculatione naturalium, secundum quod antiquis Auctoribus examinavi & percepi, imo & egomet Albertus, ut in pluribus veritatem inveni, & veritatem suppono (eo modo) quo ab aliquo ex CHYRANDIS libro, & libro ALCHORAT (sc. ernere licuit) Where it is plain enough, that it was full Written CYRANIDIS libro & ARPOCRA II-

As for Medicines, I know no Specifick mentioned by the Ancients, and very few by the Moderns, which he has not, besides many. that are to be met with no where elfe. because for some Ages past, to have been a Magician, or a Wife Man, was Capital, it will be necessary to remove some Prejudices received against Magick or Wisdom, which I think cannot better be done, than by shewing what true Magick or Wisdom is, and how far is is confiftent with the Holy Scriptures, which feem most to condemn it. Now, Magick I take to be a skill which by a certain Power, yet not supernatural, but created, is able to do unufual things, whose Causes are beyond the common Comprehension of Men. In this Definition we exclude Miracles, as supernaturally wrought by the Finger of GOD. And by excluding from it all Diabolical Contract, we mult intend no other than Magick purely natural, or the Skill of managing. Nature by Art, fo as to accomplish strange things. We know it was the Ambition of Knowledge that ruined our First Parents; but they had to do in that Affair with the Devil. And I make no doubt, but they had the Knowledge of Good, before they

they taited of the Tree of Knowledge Good and Evil, the latter part whereof has a most obliterated the former in their posterity though the former is that which we aim a and which Adam undoubtedly had in his In For all the Learned hold him to nocency. have had an exact Knowledge of the Verrue of things before the Fall. And this Know ledge was delivered from Father to Son before the Flood, till Seth engraved it on Pil lars, and so by those Monuments, as well by Noah's oral Tradition, the Post-Diluvi ans were instructed in the same. is faid to have had skill in Astrology. the Scriptures testifie, what skill in the Magical of Imagination his Grand-son Jacob had, from his pilled Rods, that he fet before the Flocks when they conceived. Mofes is not only ac counted a Magician by Heathen Writers, but the Scriptures testifie, how he was learned in all the Wildom of the Agyptians, whereof Magick was no small Share, as their Magici! ans working Wonder for Wonder with Mol ses, a little while, prove.

We read also of wise Charming in the Psalms, of which fort of Charming we have a Form in this Book, pag. 152. And if we should narrowly enquire into all the Books of Scripture, we might perceive, that the Authors of them were skilled in the power of Nature, as well

as of Godliness, the former whereof, was, and is called Magick. Nay, the Magi of the East, were more devout in following their Star, to worship our Saviour, than all the Nation of the Jews. So that Magick (unless with Janues and Jambres, we use it in opposition against GOD) is not only lawful, but commendable.

But whereas Kirani undertakes to cast out. and drive away evil Spirits by natural Means, this is but what Tobias in the Apocrypha did by the persuation of the Angel: For he remembred the words of Raphael, and took coals for perand put the Heart and Liver of the Fife thereupon, and made a perfume. The which smell when the evil Spirit had smelled, he fled into the utmost parts of Ægypt, whom the Angel bound. The Angel likewise told Tobias, that as for the Gall, anount a Man that has Whiteness in his Eyes, and he shall be healed. And he took hold of his Father, and sprinkled of the Gall in his Fathers Eyes, saying, be of good hope my Father. And when his Eyes began to prick, he rubbed them; And the Whiteness pilled away from the corners of his Eyes, and then he saw his Son. Now Kirani so far explains the Apocrypha, as to tell us the Heart, the Liver and the Gall of what Fish it is, that does these things.

I remember, I have heard of a Physician, eminent for the cure of Lunaticks, who is fail to have used suffurnigations or perfumes of

fomething in his Cures. And fuch you manneet with here.

You must take notice, that in the first Book in the concatenation of the Vertues things according to the four Elements, Plants are analogous to Earth, Fithes to Wal ter, Birds to Air, and Stones to Fire. Nature's Interpreters do ascribe miraculou Virtues to Gemmus; and without doubt those efficacious and abstruse properties descend from a peculiar influence of the Stars, and a better temperament of the Elements. And is it a great Argument it is so, because in the Eastern Countries, where the Sun is hottest, the best Stones are found. And therefore Kirani a feribes fiery Virtues to Stones, and makes one to be under one Planet, and another under another. But it were endless to give an account of all the Rarities herein contained Therefore with Piety and Wisdom peruse these four Books themselves. The Worth and Rarity whereof, I am afraid, has tempted some dishonest person to rob the Vatican, and of ther Libraries of them. But are now at length (maugre Envy and ill Will₂) communicated to you, for your Benefit, Farewell.

The Therapeutick (that is, the Curatory) Book of Syria, Harpocration wrote it to his own Daughter.

When formerly I travelled through the Country of Babylon, I found a City, Selentica by Name, the History whereof I have written; but we have no occasion to make any long Discourse upon that City, because we would not alwayes be upon Preambles. Now therefore let us return to our proposed Intention. Then, says he, I saw another City yet, seventeen Persian Miles distance from Selentica, which Alexander of Macedon demolished; afterwards Selentica was built, under the Dominion of the Persians, and inhabited by the Nation of the Persians. The third Year it happened, that I found an old man skill'd in Foreign Learning, and in the Greek Tongue: But he faid, he was a Syrian by Nation, was taken captive, and and he went round the lived there: City with me, and shewed me every thing. And when we came to a certain place about four Miles distance from the City, we saw a Pillar, with a great Tower, which the Inhabitants of Syria faid they brought from the Addifice of Solomon, and placed it there for the Health and Cure of the Men of that City. Looking therefore well upon it, I found it was written in strange Letters. The old Man therefore, alloon as he was asked by me, agreed to thew me, and I willingly lent an ear to him, while he discoursed, and expounded the Barbarous Letters that were upon the Pillar in the Æolick Tongue. My Son, faith he, You fee three Towers standing here, one of which is five Miles dillant, another two and a half, and another four. These were built by the Giants, who had a mind to climb into Heaven; for this their impious Midness some of them were struck with Thunder, others through the just Judgment of GOD, knew not themselves, and the rest were cast into the Isle of Crete, into which,

Now the Things that were read upon the Pillar, were these;

And there are two forts of it. The first is called the white Vine, which some call Bryony, others Snake-Grape; others Celidonia, others μίληθους others ψίλωθερν, others αρχισως ικλ, others Kethedron. The Buds, and Leaves, and Claspers of this are like the Domestick

Vine, but they are thicker, and implicated with the adjacent Fruits, catching with their Claspers; and it has a red Grape-like Fruit, wherewith Hides have their Hair fetcht off, or are prepared. And the second fort of it is called the black Vine, which they also call Bryony; and some Xespwisor, having Leaves like Ivy, but the great ones like Bind-weed, but greater; this also applies it self to, and takes hold of Trees with its Claspers. And its Fruit is like Grapes 5 they are green in the beginning, and when they are ripe, they are black without, but like Box within. And its Sprouts also at the first budding may be boyled like Pot-herbs; and they are diuretick, and force the Menstrua; they cure the Spicen. The Roots are very good for Splenetick Perfons, and the whole Herb is proper for such as are Epileptick and Vertiginous. And its Leaf in a Cataplasm with Wine, is good to cat away proud Flesh, and for wrested and diflocated Limbs, and for Relaxations; and further, it has a Virtue like to the former.

And the white Vine has other Efficacies fecular and delightful, so that being applied, it does not only give any man Sobriety, but causes Delight. A certain Saturnine King Kiranis Kuλurdegams, turning and rolling circular upon the Centre, with uncorrupt, and neverfailing Changes, whirling all things from the East to the West, in the seven Arctick, i. e. North, Stars, holding and moving all strange things. Soul, be thou content and sufficient in those things which thou actest in failing Time! and tho' thou be after Prægnation, yet presently thou knowest GOD in the Air, and in the Clouds; thou sufferest Infirmity upon the Earth, in which being an Inhabitant, thou art tormented. O blessed Soul! being thenceforth immortal, cease from corporeal Labours; tho' in these thou be fixt to the Body, yet feek Heavenly things, or from whence Water is? Let what I said before suffice thee; I tell thee in Prose, and show unto thee all the Divinations of the Soul concerning all Virtues; I will tell thee more, when they are revealed. For I have told future things in Metre, or Verse, concerning the fore-know-· ledge of other Animals. For the præscience of those things that are in Heaven and in Earth, and what any one has in his Soul; and whatever things are done in Climates and Cities, and all future things to Men. There is an Animal flying in the Air, which is called ewoth, upupa, or Houp, of seven Colours, having a Crest on his Head, the height of two Fingers, which extends and contracts. And it is of four Co. lours, that it may be directed to the four Seasons of the Year. This Bird is called Cucubas, as it is written concerning the same, in Book I. HARPOCRATION.

Very many false Sophisters are mistaken in the Understanding of the immortal Soul; but it discerns it self. Why is it, that the Body is at rest in Bed, and the Soul is conversant in its proper place, i. c. in the Air, whence also we took this Soul, and sees what things are done in other Climates? Of Goddess Venus her Girdle; The kind of Venus. The first and strong Cestus, i. c. Further also; Upon the Stone Opfarius engrave a Man having his Privities cut off, placed or lying at his Feet, and his hands contracted underneath; and himself reaching down to his Privities, and behind his back let there be Venus, having back to back, the turning her felf, and feeing him. Enclose therefore the Stone of the Fish Cynedius. But if you have not one of them which are under the head, you must put underneath the Root of the Herb, and the end of the Bird's left wing. Enclose it in a large Gold Box, and you must put it into a thong of thenerve of a Hawk's Stomach, let it be thin, sewing it in the middle of the thong or nerve, that it do not appear. This is that which is painted in the head of Venus, comprehended in a thong or ligature, which is called Cestus. That a Male may not erect; If any one touch a Male with the thong or ligature, he will

not erect, and if he carries it unknowingly, he grows effeminate. And if he carry any of the Stone of the Fish, he will be altogether luxurious, not returning to his Nature. And if a Woman carry this ligature, none will carnally lie with her. For the Man cannot erect. And the measure of the ligature in respect of breadth, mult be two fingers; of length, five palms. Another Preparation of Venus; There is also another Veslel or Preparation of Venus, which the Queens of Venus carry in pure Gold, and whoever elfe are able. There also must be in a ligature, which is made of a nerve in such a manner, as that the stones appear not, having a Sculpture, as is subjoyned. Satyrion is an Herb like Spinosa, and it starts up with its whole Stalk from the Ground; it is two Palms in heighth, sull of Seed: It and the Seed have a watrish pale Colour. The Estrich is a known Bird. The Sea-Cow is an edible Fish, well coloured and known. The immaculate Saphire is dedicated to Venus. Therefore the Preparation of the Herb is in this manner; For spent and barren Women, and for Coition, and for such as have a watry and thin seed, and which cannot conceive, and such as are withered and dry: For this is arid and deletable, and gives Conception. If before Coition, you strew it on the virile Member, anointed with Honey, the Woman will be debilita-

48 ted beyond measure. And if the Woman be so anointed, the Intenseness of the Act will be great: For it dries up Nature, and causes Conception, and makes barren Women conceive. And it is prepared thus: Of Satyrion Seed 3ij. and Seed of Pepper 3j. Alumen sciffile 3j. (but according to another Book) 3ij. Stypleria rotunda, i. c. common Allum Zij. Aromate aridis zij. Lay it up in a Vessel, and communicate it to no man. The Preparation, or Confection of Aromate aridts is thus, Coftus Ziij. Spikenard 38. (in another Book Ziij.) Carpobalfamim 3iij. Amomum 3\beta. (in another place 3v.) Cloves zij. Cassia zij. Storax zv. Opobalsamum zj. Roses exungulated Ziiij. Musk 38. Powder the dry things very finely, and fift them well. Then rub the Storax a long time apart, and then with the beaten Roses and Balsam, and all mixt together, make Trochices: Afterwards suffurnigate them, and dry them in a Show, thyinum of Tree-Moss and Storax, and Matrich, and Quails Claws, and Coffus, which being dried, put them up in a Glass Vessel, and when you have occasion for Conception, powder two Trochifes. And this is Confectio aromatic sieca. And the Bird Estrich has an Echidirum, which is called Suffuvium aridum, the inner Skir of the Gizzard: This powdered, and given in Drink secretly, procures Love Tuxury. And the Stone of the Echinus,

i. e. of the Gizzard of an Estrich, with one Grain of Satyrion, powdered and given in Meat or Drink secretly, procures great Intenseness to them especially, who are impotent in Coition. And the Stone it felf, only hung about the Neck, causes good Digestion, and Intenseness in Coition. And the Stone of the right Temple of the Sea-Cow, carried about one, causes Intenseness, or Erection. And the left Stone does the contrary. And the Fat of the Fish causes great Delights, beaten up, or dissolved with Honey, and anointed on both Genitals. Engrave therefore upon a Saphire-Stone an Estrich holding a Sea-Cow in its Mouth, and put underneath a grain, of Satyrium and a little of the Stone, which is in the Echinus or Gizzard of the same Bird, and enclosing it, wear it, against all indigestion and for Tension and Love. For it is very good for those that desire to use much Coition, and for old Men. And it makes him that wears it, gracious.

Thus Harpocration finished this Book, and I found no other Book of them that are called Kirahides. But indeed in this, I say, Harpocration was dissonant from Kirahi, or the one from the other: But we collected every Chapter out of each, as is set down, and we have made a Book, omitting nothing. And now we will pass to the other Books of Kirahi, that we may reap benefit by them.

For if a man put a She-Goat's skin about one, troubled with the Falling Sickness, and lead him along a River or the Sea-fide, by and by he will be taken falling and trembling, and in an agony. For People in bloody Fluxes; And the Blood of a She-Goat heated over the Fire and eaten, cures Dysenterick persons, and effectually saves them, that have drank poysonous potions, and perfectly cures people of the Dropsie. And the Gall applied with Honey without dross cures Dimnels, Speck, and the Pin and Web in the Eyes. The Spleen also of a She-goat roasted and eaten, cures the bloody Flux. And its dry Dung drunk with wine and honey belps difficulty in Urine. And its Dung Dung mixt with Pultefles, and spread upon the Sores, heals them that are stung with a Spider, or Serpent, or a Prester. And boiled in old wine and applied, it perfectly cures swellings of the Limbs, and Genitals, and Breafts. And mixt with Honey and melted and applied, it cures them, and draws out all Venom. And the Spleen of a She Goat taken fresh and hot in the Name of the Patient, laid upon the Spleen of one troubled with the Spleen, and swathed on only one day, afterwards taken off, then let the fick party hang it in the Smoak, or Sun, or Wind; as much as the Spleen of the She-Goat dries away, fo much will the Patient's Spleen waste. Chirurgery for Buboes. The Stones help Conception, and hinder Conception. For if any one mix the right stone in an Unguent, and put it in a Peffary with wool, and use coition, the will, as I faid, conceive presently. The *Kyranides* is a compilation of several earlier works, notably the treatise of Harpocration, that deal with the occult and magical properties of birds, animals, plants and stones. The *Kyranides* is truly an ancient text, dating to between the 2nd and 4th centuries A.D. The eminent scholar of Hermeticism, Garth Fowden, describes the *Kyranides* as the most important source for the Hermetic doctrine of the occult virtues and powers.

The *Kyranides* is divided into four books, loosely organized by the letters of the Greek alphabet. Each chapter contains the magical and occult properties of animals, birds, plants and stones beginning with that letter, plus the first book includes instructions for talismans using the appropriate plants, animals and stones. This translation of the *Kyranides* was made in 1685 and is the only complete translation available in English of this key Hermetic text.
